New in paperback! The Triumph Speed Twin & Thunderbird Bible reveals the definitive history of two of Triumph's most popular motorcycles in the 40s and 50s. From development history to sporting achievements, this book is packed with detailed information – everything an owner or would-be owner of one these classic twins needs!

Royal Enfield's famous motor - 'made like a gun' - hints at the factory's origins, but few appreciate that it is the oldest motorcycle manufacturer in existence that can boast of continuous production. In addition, its famous Bullet can claim the longest motorcycle production run of all time. Greg Pullen charts the rise, fall and rise again of Royal Enfield, from the company's pre-motorcycle beginnings in Redditch, through the impact of two World Wars, the importance of exports to India and subsequent establishment of factories there, to changes in ownership, recently launched models and new concept bikes for the future. With 190 colour photographs, this book includes: the V-twins, from the 1930s K and KX range to a glimpse of the concept V-twin shown in 2018; the singles, from 2-strokes to side-valve 4-strokes, and the ohv version that first used the Bullet name, through to the new singles built in India. The British Bullet: its arrival in 1948 and production in the UK, the original orders from India and subsequent setting up of production there are discussed. The 250s, (1958-68), including the Turbo Twins, and the big twins, from the 1948 500 Town to the final interceptor in 1970, including the 800cc prototype and the Clymer Indians are covered. The new twins: the 650cc Royal Enfield interceptor and Continental GT twins and the Bobber concept bike are discussed. Competition success is covered, with notable ISDT achievements, star rider Johnny Brittain and racing the big twins, and Geoff Duke in the GP5. Finally, the British factories and the new opportunities with the Indian factories are remembered.

Go on a 60-year ride with Harley-Davidson's Sportster Things got a little weird in the American motorcycle industry after World War II. People hungered for new motorcycles, buying just about everything manufacturers could build. But on rare

occasions a manufacturer produced a machine that nobody wanted. Such was the case with the Harley-Davidson Model K. The Model K had most of the features buyers wanted in a modern machine, like hand-operated clutches, foot-operated shifters, and cool-running aluminum heads, but it lacked perhaps the most important technological upgrade: a modern overhead-valve valve-train design. The Model K retained the antiquated side-valve design because of arcane AMA racing rules written when Harley-Davidson and Indian competed head-to-head on American racetracks, but by 1952 Indian was on its last legs. This should have made the Model K a massive sales success. What nobody counted on was the British bike invasion. Thanks to their modern overhead-valve engines, the lightweight British bikes humiliated the side-valve Harleys on the track and on the street. Upgrades to the Model K didn't help; Harley finally relented and introduced a new overhead-valve middleweight for the 1957 model year. Dubbed the Sportster, it was everything the Model K was not. More importantly, it was faster than the British competition. Thus began the Sportster's sixty-year reign. Harley-Davidson Sportster: Sixty Years tells the complete Sportster story. Noted Sportster expert Allen Girdler covers all the bikes--the XLCH, Caf_ Racer, XR1000, XLX, 883, Iron, Forty-Eight, Seventy-Two, and Nightster--that have made the Sportster one of the most iconic motorcycles on earth.
