This is a chemistry assignment and i have found almost all the answers but i want to check the answers because it is worth a grade. The puzzle starts off with directions as following: The first 18 elements on the periodic table are described below in a series of statements. The first 18 letters have been assigned to

the right side of the reaction. Secondly, all of the solutions are chemical words. A chemical word is a word that can be made using symbols from the periodic table. For example, the chemical word POSSEsSiON is made using the symbols for phosphorus (P), oxygen (O), sulfur (S), Einsteinium (Es), silicon (Si), and nitrogen (N). You don't need to be familiar with the periodic table to solve these problems; nor do you need to know any chemistry. You just need to be able to count and unscramble elements to make words. This 'Medium' volume consists of words with 6 symbols, which involves familiarity with common 6 to 12 letter words. A unique feature of this book is that there is a Hints section at the back separate from the Answers section, for puzzlers who may be stuck and want to check just the first letter of the solution. MORE EXAMPLES: (1) $S + Ni + Ge + U \rightarrow _ _ _ _ _ _ .$ (2) $2 C + N + 2 I + P \rightarrow _ _ _ _ _ _ .$ (3) $Ti + C + Cr + P + Y \rightarrow _ _ _ _ _ _ .$ (4) $2 C + U + 2 S + Es \rightarrow _ _ _ _ _ _ .$ You can find the answers below. Note that this medium volume consists of chemical words with 6 symbols. There are also easy and hard puzzles (available in separate volumes), which consist of shorter and longer chemical words. ANSWERS: (1) GeNiUS (2) PICNIC (3) CrYPTiC (4) SUCCEsS.

A coloring book to familiarize the user with the Primary elements in the Periodic Table. The Periodic Table Coloring Book (PTCB) was received worldwide with acclaim. It is based on solid, proven concepts. By creating a foundation that is applicable to all science ("Oh yes, Hydrogen, I remember coloring it, part of water, it is also used as a fuel; I wonder how I could apply this to the vehicle engine I am studying...") and creating enjoyable memories associated with the elements science becomes accepted. These students will be interested in chemistry, engineering and other technical areas and will understand why those are important because they have colored those elements and what those elements do in a non-threatening environment earlier in life.

VERBAI ReAcTiONS are a new form of word scrambles with a chemical flavor. You don't need to know any science to be able to solve VERBAI ReAcTiONS puzzles, but the puzzles bear a resemblance to chemical reactions. Here is a sample: $Es + 2 S + P + Si + 2 O + N \rightarrow _ _ _ _ _ _ _ _ .$ This VERBAI ReAcTiON is a word scramble consisting of one Es, two S's, one P, one Si, two O's, and one N. That is, the word scramble contains the elements Es, S, S, P, Si, O, O, and N. Unscramble these elements to form an 8-symbol word (that's why there are 8 blanks in the puzzle). For this puzzle, the answer is P O S S Es Si O N (possession). These VERBAI ReAcTiONS resemble chemical reactions in two ways. First, the scrambled elements appear added together on the left of the reaction with coefficients (like the number 2 in the puzzle above) telling you how many of each element the solution contains, and you fill in the result of the VERBAI ReAcTiON by rearranging the elements and writing them on the blanks on the right side of the reaction. Secondly, all of the solutions are chemical words. A chemical word is a word that can be made using symbols from the periodic table. For example, the chemical word POSSEsSiON is made using the symbols for phosphorus (P), oxygen (O), sulfur (S), Einsteinium (Es), silicon (Si), and nitrogen (N). You don't need to be familiar with the periodic table to solve these problems; nor do you need to know any chemistry. You just need to be able to count and unscramble elements to make words. This 'Hard' volume consists of words with 7 to 8 symbols, which involves familiarity with common 8 to 14 letter words. Other 'Medium' and 'Easy' volumes consist of shorter words. A unique feature of this book is that there is a Hints section at the back separate from the Answers section, for puzzlers who may be stuck and want to check just the first letter of the solution. MORE EXAMPLES: (1) $S + Ni + Ge + U \rightarrow _ _ _ _ _ _ .$ (2) $2 C + N + 2 I + P \rightarrow _ _ _ _ _ _ _ _ .$ (3) $Ti + C + Cr + P + Y \rightarrow _ _ _ _ _ _ _ _ .$ (4) $2 C + U + 2 S + Es \rightarrow _ _ _ _ _ _ _ _ .$ You can find the answers at the end of this paragraph. Note that this hard volume consists of chemical words with 7 to 8 symbols, which are longer than the examples shown here. We recommend starting with our easy or medium puzzles before tackling these hard puzzles (available in separate volumes). ANSWERS: (1) GeNiUS (2) PICNIC (3) CrYPTiC (4) SUCCEsS.

Physical Science for grades 5 to 12 is designed to aid in the review and practice of physical science topics. Physical Science covers topics such as scientific measurement, force and energy, matter, atoms and elements, magnetism, and electricity. The book includes realistic diagrams and engaging activities to support practice in all areas of physical science. --The 100+ Series science books span grades 5 to 12. The activities in each book reinforce essential science skill practice in the areas of life science, physical science, and earth science. The books include engaging, grade-appropriate activities and clear thumbnail answer keys. Each book has 128 pages and 100 pages (or more) of reproducible content to help students review and reinforce essential skills in individual science topics. The series is aligned to current science standards.

Chemical word scrambles are an exciting new form of word puzzles. You don't need to know any chemistry! These chemical word scrambles will appeal to all word puzzle lovers, whether or not they also enjoy science. Each word is composed of symbols from the periodic table, instead of letters; but you don't need to be familiar with the periodic table to solve the word scrambles. Here is an example: The words BRaIn PoWEr are composed of the following symbols for chemical elements: B for boron, Ra for radium, In for indium, Po for polonium, W for tungsten, and Er for erbium. In chemical word scrambles, the words have been scrambled by rearranging the symbols – not the letters. Symbols that have two letters – like He for helium and Nd for neodymium – can't be split or have their letters reordered. ••• This creates a significant distinction between ordinary word scrambles and chemical word scrambles. For example, the symbols Er, V, S, and Es may be combined to form the word SErVEs, but not the word SEVErs because symbols would have to be split to form SEVErs. One neat difference between ordinary word scrambles and chemical word scrambles is that chemical word scrambles allow us to make use of a vocabulary of longer words without effectively increasing the difficulty of the puzzle. For example, the word VErBAI is a 6-letter word, but only a 4-symbol word. When trying to rearrange the symbols Al, Er, B, and V to form the word VErBAI, there are fewer permutations to consider compared to rearranging the 6 letters A, l, e, r, b, and v to form the word verbal. We saw this as an excellent opportunity to make word scramble puzzles that involve a vocabulary of longer words. ••• The level of difficulty of this Chemical Word Scrambles puzzle book is EASY to MEDIUM. This book includes words that have 4 to 6 symbols, and therefore 4 to 12 letters; most of the words have 5 to 9 letters. Each puzzle features a challenge word made by rearranging the first symbol of each word. A unique feature of this book is that there is a Hints section at the back separate from the Answers section, for puzzlers who may be stuck and want to check just the first letter of the solution. ••• This travel-size book comes in a convenient size for traveling, and uses a different word list than the full-size books.

opportunity to make word scramble puzzles that involve a vocabulary of longer words. The level of difficulty of this Chemical Word Scrambles puzzle book is EASY. This book involves words that mostly have 4 to 5 symbols, and therefore 4 to 10 letters. Puzzlers who can solve harder word scrambles may want to begin with this EASY volume to get the hang of unscrambling words in terms of chemical symbols before moving onto MEDIUM (6 symbols) or HARD (7 to 9 symbols). Each puzzle features a challenge word made by rearranging the first symbol of each word. A unique feature of this book is that there is a Hints section at the back separate from the Answers section, for puzzlers who may be stuck and want to check just the first letter of the solution.

This pack contains a 300-piece jigsaw of the Periodic Table for children to assemble, while learning the positions and groupings of all 118 elements. It also includes a 16-page book explaining the Periodic Table in a fun and accessible way, and is packed full of fascinating facts about and uses of the elements that make up the world around us. Illustrations: Full colour throughout

Connect students in grades 5–8 with science using Science Games and Puzzles. This 96-page book promotes science vocabulary building, increases student readability levels, and facilitates concept development through fun and challenging puzzles, games, and activities. It presents a variety of game formats to facilitate differentiated instruction for diverse learning styles and skill levels. Coded messages, word searches, bingo, crosswords, concentration, triple play, and science jeopardy introduce, reinforce, review, and quickly assess what students have learned. The book aligns with state, national, and Canadian provincial standards.
