Chief Security Officer (CSO) - is responsible for the implementation of Port Authority policy on security matters, both physical and informational, and for the coordination of security initiatives throughout the Port Authority in order to assure consistency in practices, procedures and processes.

This model course has been based on MSC/Circ.1189, 'Guidelines on training and certification for Port Facility Security Officers', and aims to provide knowledge to those who may be designated to perform the duties and responsibilities of a Port Facility Security Officer (PFSO), as defined in section A/2.1.8 (and section A/17) of the ISPS Code, and in particular the duties and responsibilities with respect to the security of a port facility, for ensuring the development (or for developing) of a Port Facility Security Assessment, for ensuring the development (or for developing) of, implementing, maintaining and updating a Port Facility Security Plan and for liaising with Ship Security Officers (SSOs) and with Company Security Officers (CSOs).

This model course is intended to provide the knowledge required to enable personnel without designated security duties in connection with a Port Facility Security Plan (PFSP) to enhance security in accordance with the requirements of Chapter XI-2 of SOLAS 74 as amended, the ISPS Code, the IMDG Code, the IMO/ILO Code of Practice on Security in Ports, and guidance contained in IMO MSC.1/Circ.1341. Successful trainees should contribute to the enhancement of maritime security through heightened awareness and the ability to recognize security threats and respond appropriately.

This model course has been based on MSC/Circ.1154, 'Guidelines on training and certification for Company Security Officers', and aims to provide knowledge to those who may be designated to perform the duties and responsibilities of a Company Security Officer (CSO), as defined in paragraph 2.1.7 (and paragraph11) of the ISPS Code, Part A, and in particular the duties and responsibilities with respect to the security of a ship, for ensuring the development (or for developing) of a ship security assessment, for ensuring the development (or for developing), implementation, maintenance and updating of a ship security plan and for liaising with Ship Security Officers (SSOs) and with Port Facility Security Officers (PFSOs).

This model course is intended to provide the knowledge required for port facility personnel with designated security duties, such as guards, access control officers, training officers and relevant port facility managers, in connection with a Port Facility Security Plan (PFSP) to perform their duties in accordance with the requirements of the International Convention for the Safety of Life at Sea (SOLAS), chapter XI - 2, the International Ship and Port Facility Security (ISPS) Code, the International Maritime Dangerous Goods (IMDG) Code, the IMO/ILO Code of Practice on Security in Ports, and guidance contained in IMO MSC.1/Circ.1341 on Guidelines on Security-related training and familiarisation for port facility personnel

IMO publication sales number: T321E.

The International Ship and Port Facility Security Code (ISPS Code), adopted in December 2002, seeks to: establish an international framework for co-operation between governments and government agencies, local authorities and shipping and port industries to detect and assess security threats and take preventive measures against security incidents affecting ships or port facilities used in international trade; to establish relevant roles and responsibilities at the national and international level for ensuring maritime safety; and to enable efficient collation and exchange of security-related information. These objectives are to be achieved by the designation of appropriate personnel on each ship, in each port facility and in each shipping company to prepare assessments and effect security plans. This publication includes the ISPS Code, relevant amendments to the SOLAS (International Convention for the Safety of Life at Sea) Convention and other resolutions.

This user guide has been developed to consolidate existing IMO maritime security-related material into a companion guide to SOLAS chapter XI-2 and the ISPS Code so as to assist States in promoting maritime security through development of the requisite legal framework, associated administrative practices, procedures and the necessary material, technical and human resources. The intention is to assist SOLAS Contracting Governments in the implementation, verification, compliance with, and enforcement of, the provisions of SOLAS chapter XI-2 and the ISPS Code.

International Maritime Security Law, by James Kraska and Raul Pedrozo, defines an emerging interdisciplinary field of law and policy comprised of norms, legal regimes, and rules to address today's hybrid threats to the global order of the oceans
