Smart Prepaid Energy Meter Using GSM Module

A smart meter is a new generation of energy meter that puts you in control of your energy – by measuring how much you use and on what kind of appliances. Then, unlike your old meter, it shares this info with you – online and on an In-Home Display. What will a smart meter do for me?

Smart meters - Spark™ - Bringing Energy to Life

Prepaid Electricity Energy Meter is a good concept in which you can recharge its balance, like we do in our mobile phones. In this project we are building a automated system by using Arduino and GSM module. You can recharge the electricity balance through this system, just by sending a SMS. It can also disconnect the home power supply connection, if there is low or zero balance in the system.

Prepaid Energy Meter Project using Arduino

Smart meters can be set to prepayment mode or credit mode, so if you are a prepayment customer and you have had a new smart meter installed, the good news is that you can top up on an app or online. How do you remove a prepayment meter? If you rent, you need to seek permission from your landlord before you can remove a prepaid meter.

Prepaid Energy Meters | MoneySuperMarket

GSM network is used for sending SMS to the local authorities regarding the theft cases. This meter can work as either prepaid or post-paid meter. The proposed system replaces traditional meter reading methods and enables remote access of existing energy meter by the energy provider.
