The last problems were attacks from neighboring communities. The people of Mesopotamia wanted to keep their people safe and under control, so what they did was build strong walls made of sun-baked bricks. That helped from surprise attacks. They also put moats around the walls to make it difficult for people to cross.

Major approaches to the control problem include alignment, which aims to align AI goal systems with human values, and capability control, which aims to reduce an AI system's capacity to harm humans or gain control. Capability control proposals are generally not considered reliable or sufficient to solve the control problem, but rather as potentially valuable supplements to alignment efforts.
