Overview of Psychology for Beginners *- Verywell Mind*

Psychologists don't stop at the intersection of stress, disease, and coping. They're also attempting to apply what they know about human behavior and mental processes to the problems of health in general. They're looking for ways to keep people physically well and trying to find out how people's behavior contributes to illness.

Color psychology is the study of how colors affect our emotions and behaviors. As soon as we perceive color, our brain and endocrine system (the hormone producer) receive the input, releasing hormones throughout our body. As a result, this subconscious interaction has a powerful impact on our emotions.

Quantum Psychology is not intended to make you better, more virtuous, teach you how to have great relationships, how to make more money, or even how to feel more comfortable in your life. Rather, it is concerned with developing awareness so that you can discover Who You Are, even beyond awareness itself.
