Reading Plus, an evidence-based online program that uses personalized instruction to improve students' reading proficiency, today announced its presentation of "Building Lifelong Readers in Secondary ...

Its innovative design allows intermediate-level students to use four key sections concurrently to become better readers in school, college, or business.

"'More reading power' Seecond edition, is a student-centered reading skills textbook based on a cognitive skills approach. Its four key sections, designed to be used concurrently, help intermediate to high-intermediate students develop solid reading skills necessary in school, college, or business."--Cover.

Help young writers learn to engage and invite their reader's thinking with five key thinking strategies - connect, question, visualize, infer, and transform.

Unleash powerful teaching and the science of learning in your classroom Powerful Teaching: Unleash the Science of Learning empowers educators to harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute-without additional prepping, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With Powerful Teaching, you will: Develop a deep understanding of powerful teaching strategies based on the science of learning Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research-based perspective Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom Powerful Teaching: Unleash the Science of Learning is an indispensable resource for educators who want to take their instruction to the next level. Equipped with scientific knowledge and evidence-based tools, turn your teaching into powerful teaching and unleash student learning in your classroom.

Previous ed. published: N.Y.: Pearson Longman, 2003; More reading power / Beatrice S. Mikulecky, 2nd ed.

Intended for beginning-level young adult and adult students of English as a Second Language, this innovative text combines the elements of a successful reading program with a unique, developmental format designed to teach a wide range of reading skills. The four sections of "Reading Power" are designed to be used concurrently. Each focuses on a different aspect of reading: "Reading for Pleasure" - This section stresses independent reading by suggesting a variety of ways to choose books and also offers a list of high-interest readers for students to enjoy. "Reading Comprehension Skills" - This series of exercises provides focused instruction to develop necessary reading skills: previewing, scanning, guessing word meanings, finding topics, main ideas, and patterns of organization, using reference words effectively, and skimming. "Reading Faster" - These short fiction and non-fiction passages form a continuing story line and offer practice for improving reading speed and comprehension. "Thinking Skills" - These exercises are designed to provide practice in recognizing logical thought patterns in English and guessing the meanings of words from the context.
