Conditioning by R.S ...

The main difference between refrigeration
and air conditioning is that refrigeration, in
general, refers to any process where
thermal energy is taken away from a place
and transferred to a place with a higher
temperature. Air conditioning is a type of
refrigeration where thermal energy is
taken away from the air (typically in a
room or a vehicle) in order to keep the air
cooler. What is Refrigeration

Refrigeration compressors and air conditioning compressors provide air conditioning, heat pumping, and refrigeration for large-scale facilities and equipment. They use compression to raise the temperature of a low-pressure gas, and also remove vapor from the evaporator. Most refrigeration compressors (refrigerant compressors) are large, mechanical units that form the heart of industrial ...
