Tutorial Guide to AutoCAD 2018 provides a step-by-step introduction to AutoCAD with commands presented in the context of each tutorial. In fifteen clear and comprehensive chapters, author Shawna Lockhart guides readers through all the important commands and techniques in AutoCAD 2018, from 2D drawing to solid modeling and finally finishing with rendering. In each lesson, the author provides step-by-step instructions with frequent illustrations showing exactly what appears on the AutoCAD screen. Later, individual steps are no longer provided, and readers are asked to apply what they've learned by completing sequences on their own. A carefully developed pedagogy reinforces this cumulative-learning approach and supports readers in becoming skilled AutoCAD users. Tutorial Guide to AutoCAD 2018 begins with three Getting Started chapters that include information to get readers of all levels prepared for the tutorials. The author includes tips that offer suggestions

Each chapter concludes with end of chapter problems providing challenges to a range of abilities in mechanical, electrical, and civil engineering as well as architectural problems.

In *Schools with Spirit*, twelve respected educators show how they welcome the sacred into their own work with students, in spite of their fears of "overstepping" and in the face of the complex obstacles to nurturing the inner life of children in a school setting. Since the mid-1990s, when Daniel Goleman established that nurturing a young person's "emotional intelligence" enhances his or her ability to learn, schools have been struggling with ways to attend to students' emotional and social -- as well as intellectual -- development. Yet too many recent books and programs tout the "character education" of children as a cure for incivility and worse, and too many of these are barely disguised tracts with religious or culturally noninclusive agendas.
