The rower should be able to attain a vertical shin at the catch, so the footplate should be set low down and at an angle of 42° . If the footplate is set too high, the rower will not be able to achieve full compression and in addition the boat will be less stable. If it is set too low, the rower may over compress.

~~Rigging your boat to make the most of your rowing~~

General Rigging Concepts. You want to adjust the rig of your boat so that: The height of your hands is comfortable. If your hands feel too high, lower the height of your oarlocks. In most boats, this can be done by removing the nut at the top of the pin, and transferring washers from below the oarlock to above the oarlock.

Rigging Guide Rowing BASIC RIGGING
12 3.0 TERMINOLOGY The sport of
rowing is divided into two distinct
categories: sculling and sweep rowing.
Sculling events require each athlete to use
two oars, which are pulled simultaneously
and range from the single scull to the
quadruple sculls. Handbook - Level 1 -
World Rowing Federation

~~Rigging Guide Rowing - do.quist.ca~~
It is written in BASIC ROWING
TECHNIQUE that the goal in rowing is to
have the athlete, the moving power, propel
the boat through the water. The moving
power or propulsive force is sup-plied
intermittently because the oar is both in
the water with force being applied and out
of the water with no force being applied.
