Jervis describes the process of perception (for example, how decision makers learn from history) and then explores common forms of misperception (such as overestimating one's influence). He then tests his ideas through a number of important events in international relations from nineteenth- and twentieth-century European history.

Robert Jervis Perception and Misperception in ...

Robert Jervis is a professor of international politics at Columbia University. He studies the intersection of psychology and international relations. His work challenges popular notions about nuclear deterrence by noting the complexities that perception and misperception introduce to deterrence and foreign relations as a whole.

Online Library Robert Jervis Perception And Misperception Bayanbox

In *Perception and Misperception in International Politics*, UCLA political scientist Robert Jervis seeks to demonstrate that decision-makers' perceptions of the world and of other actors diverge from reality in detectable patterns that may be understood. Jervis analyzes the methods by which decision-makers process information and form, maintain, and change their beliefs about international relations and other actors.

Jervis, *Perception and Misperception in International ...*

Jervis' classic book looks at the role of misperception in international politics, and assesses the extent to which it can be used to explain decisions by elites. Specifically it focuses on the role of decision-making in circumstances of limited information, as well as the role that cognitive biases play in the interpretation of such
