**B.07 Stair Lift (Savaria)**

If the stairs have any turns, curves or intermediate landings, the Savaria Stairfriend curved stairlift would be required. To use a stairlift, the rider needs to be able to get on and off of the seat; the lift cannot accommodate mobility devices such as wheelchairs or walkers. When not in use, the stairlift folds up to allow access to the stairs.

Discover sustainable methods for designing crucial building systems for architects. This indispensable companion to Norbert Lechner's landmark volume Heating, Cooling, Lighting: Sustainable Design Methods for Architects, Third Edition completes the author's mission to cover all topics in the field of sustainable environmental control. It provides knowledge appropriate for the level of complexity needed at the schematic design stage and presents the most up-to-date information available in a concise, logical, accessible manner and arrangement. Although sustainability deals with many issues, those concerning energy and efficiency are the most critical, making an additional goal of this book one of providing architects with the skills and knowledge needed to create buildings that use electricity and water efficiently. Guidelines and rules-of-thumb are provided to help designers make their buildings use less energy, less water, and less of everything else to achieve their primary objectives. In addition, this book: Addresses ways to reduce electricity usage through more efficient lighting systems and appliances and by incorporating automatic switches and control systems that turn off systems not in use. Covers the design of well-planned effluent treatment systems that protect against potential health hazards while also becoming a valuable source of reclaimed water and fertilizer Provides coverage of fire protection and conveyance systems, including very efficient types of elevators and escalators and designs that encourage the use of stairs or ramps. Complete with case studies that illustrate how these systems are incorporated into large-project plans, Plumbing, Electricity, Acoustics is an indispensable resource for any architect involved in a sustainable design project.

"An incisive piece of criticism that offers, in an elegant set of readings, new insights into "Ulysses" as an epic of Irish nationhood. It adds significantly to our understanding of how Joyce's "Ulysses," by being national first, is international in the end, by showing how a text produced at a moment of Ireland's achievement of independence can offer a model of new nationhood to the world." --Enda Duffy, University of California, Santa Barbara "Although much has been written recently on the subject of Joyce and history, this illuminating book fills an important critical gap by examining how "Ulysses" construes the 'epic' as a distinctive discursive domain for historiography." --Dominic Manganiello, University of Ottawa Ungar argues that Joyce's "Ulysses" is the Irish national epic--a new national epic written at the moment a new nation, the Irish Free State, was being founded, and one that evades the potential constraints of the epic tradition in order to draw attention instead to what Ungar calls "the change required in Ireland's too formulaic self-definition." This is the first full-length study of how Ireland's accession to political sovereignty figures in the compositional design of "Ulysses." Ungar explores the parallel between the program of Sinn Fein founder Arthur Griffith and the meeting of Stephen Dedalus and Leopold Bloom, with their dreams of self-expression and continuity. He reads the work as a fable of the new kinds of remembering, relations among ancestors, and "epic rhyming" that are required to imagine a new national entity, and he delineates the features of this fable by carefully wrought close readings of key moments in the novel. In the process he succeeds in uniting an older, eminently distinguished brand of Joyce criticism with the insights of the younger generation of critics. Ungar adds a wealth of valuable new detail to the relation of Joyce's Ireland and Leopold Bloom's Hungary, which is central to his argument, and ingeniously links Molly Bloom to Stephen Dedalus's focus on the issue of national identity. Andras Ungar teaches in the multidisciplinary program of the Liberal Arts College at Concordia University, Canada.

In Gardens of the Roman Empire, the pioneering archaeologist Wilhelmina F. Jashemski sets out to examine the role of ancient Roman gardens in daily life throughout the empire. This study, therefore, includes for the first time, archaeological, literary, and artistic evidence about ancient Roman gardens across the entire Roman Empire from Britain to Arabia. Through well-illustrated essays by leading scholars in the field, various types of gardens are examined, from how Romans actually created their gardens to the experience of gardens as revealed in literature and art. Demonstrating the central role and value of gardens in Roman civilization, Jashemski and a distinguished, international team of contributors have created a landmark reference work that will serve as the foundation for future scholarship on this topic. An accompanying digital catalogue will be made available at: www.gardensoftheromanempire.org.

Assertion-based design is a powerful new paradigm that is facilitating quality improvement in electronic design. Assertions are statements used to describe properties of the design (i.e., design intent), that can be included to actively check correctness throughout the design cycle and even the lifecycle of the product. With the appearance of two new languages, PSL and SVA, assertions have already started to improve verification quality and productivity. This is the first book that presents an "under-the-hood" view of generating assertion checkers, and as such provides a unique and consistent perspective on employing assertions in major areas, such as: specification, verification, debugging, on-line monitoring and design quality improvement.

Architecture school and internships don't teach you what you need to know about being a real architect. Go inside the practice of architecture and learn what they don't teach you in architecture school. Inside are answers to all of the questions you are too afraid to ask.From getting your first job, to the construction of your first design, inside: Architecture and Design will walk you through, step-by-step, in what being an architect is really like. You don't need to worry about looking like you don't know what you are doing, nor do you need to learn the hard way, this book will guide you.

Borges Beyond the Visible presents radically new readings of some of Jorge Luis Borges's most celebrated stories. Max Ubelaker Andrade shows how Borges employed intertextual puzzles to transform his personal experiences with blindness, sexuality, and suicide while allowing readers to sense the transformative power of their own literary imaginations. In readings of "Tlön, Uqbar, Orbis Tertius," "El Aleph," and "El Zahir," Ubelaker Andrade argues that Borges, considering his own impending blindness, borrowed from Islam's prohibitions on visual representation to create a "literary theology"—a religion focused on the contradictions of literary existence and the unstable complexities of a visual world perceived without everyday sight. Embracing these contradictions allowed Borges to transform his relationships with sex, sexuality, and family in multilayered stories such as "Emma Zunz," "La intrusa," and "El jardín de senderos que se bifurcan." Yet these liberating transformations, sometimes offered to the reader as a paradoxical "gift of death," are complicated by "La salvación por las obras," a story built around Borges's relationship with a suicidal reader and the woman to whom they were both connected. The epilogue presents "Místicos del Islam," an unpublished essay draft by Borges, as a key source of insight into an irreverent, iconoclastic writing practice based on a profound faith in fiction. Compelling and clear, Borges Beyond the Visible is a revelatory examination of the work of one of the most influential authors of the twentieth century. It opens up exciting areas of inquiry for scholars, students, and readers of Borges.
