~~HOW TO SET OUT A BUILDING (SETTING OUT) PROCEDURE~~

Setting out is the process of developing the physical positions of corners and

Bookmark File PDF Setting Out

walls of a
building, and
it's done by
transferring
dimensions from
the layout plan.
Setting out
clearly defines
the outline of
the excavations
and the centre
line of the
walls, so that
the construction

Bookmark File PDF Setting Out

can be carried out according to the plan. A building is set out in order to accurately define the outline and width of the excavation and to determine the center line of the proposed building walls,

...

The basic steps
involved in
setting out the
foundation
trenches are:

The initial step

Bookmark File PDF Setting Out

is to mark the corners of the building. After which, the lengths of the sides are checked by diagonal measurements.

The axial lines (center lines) of the trenches are marked with the help of

- Setting out is done on the principle of whole to part. According to

Bookmark File PDF Setting Out

this principle
the largest
possible
rectangle of the
building is
found and set
out. The
rectangle is
further
partitioned into
small parts
(internal
rooms). • The
first thing we

Bookmark File

out on the
ground in the
correct
position. The
branch of
surveying
dealing with the
setting out on
the ground is
known as
construction
surveying.

~~Setting out work~~

Bookmark File PDF Setting Out ~~—SlideShare For~~

To set out right angles in the field, a

measuring tape, two ranging poles, pegs and three persons are required.

The first person holds together, between thumb and finger, the zero mark and

Bookmark File PDF Setting Out

the 12 metre mark of the tape. The second person holds between thumb and finger the 3 metre mark of the tape and the third person holds the 8 metre mark.

~~4. SETTING OUT
RIGHT ANGLES AND~~
