Project MUSE - Shaping Science and Technology Policy

cience and technology policy helps to initiate and shape knowledge-based innovation. But the perception endures that the research produces the innovation, and the policy is secon-dary or even beside the point of technical success—the evaporation of the government role in the creation of the Internet stands as a promi-nent example.

Shaping Defence Science and Technology in the Joint Domain: 2017 - 2021 is the inaugural joint science and technology strategy. It outlines areas of focus for science and technology to support Defence's strategy, capability and operations, and identifies which research areas have the potential to support them. To achieve this, consideration has been given to strategic guidance, changes in the future operating environment, and the current joint science and technology support to Defence.
