Software architecture

Online Library Software

Architecture refers to the fundamental structures of a software system and the discipline of creating such structures and systems. Each structure comprises software elements, relations among them, and properties of both elements and relations. The

Online Library Software

Architecture of a software system is a metaphor, analogous to the architecture of a building. It functions as a blueprint for the system and the developing project, laying out the tasks necessary to be executed by the design teams.

~~Software Architecture
And Design
Illuminated Jones
And ...~~

The software
architecture focuses
on the role of
software components.

Online Library Software

Software components consist of a simple program module or an object oriented class in an architectural design. The architecture design extended and it consists of the database and the middleware that allows the configuration of a network of clients

Online Library Software

and servers.
