2) If the date is already in the table as stored in VARCHAR format you can list the entries which are not in the right date format using the query. SELECT Col_Name FROM Tbl_Name WHERE isDate(Col_Name)<>1 The following query will help you to list all rows in the table when the length of characters in a column is less than a particular value

sql server - SQL performing data quality checks - Stack ...
In this blog post, I explain in more detail why it is bad to create collection queries using the percentage symbol "%" in them. Instead, I show you a very simple query that grabs all workstation OS without being hard on SQL Server or your SCCM site server. After that, all you need to do is create the collection for workstations.

How to Create a Collection for Workstations | Enhansoft
You can query through SQL server to the database of QC. Here are some helpful queries that I built for a dashboard for my company… —Get status of all tests in a cycle declare @completed float declare @total float declare @percentage float declare @failed float . set @completed = (select count(DISTINCT RN_TEST_ID)) from td.releases R
