The research is indisputable: Students are less disruptive and do better academically in schools that cultivate the internal motivation of students. In *Activating the Desire to Learn*, veteran educator Bob Sullo shows how to apply lessons from the research on motivation in the classroom. According to the author, we are all driven to fulfill five essential needs: to connect, to be competent, to make choices, to have fun, and to be safe. Studies show that when these needs are met in schools, good behavior and high achievement tend naturally to ensue. Written as a series of candid dialogues between the author and K-12 students, teachers, counselors, and administrators, *Activating the Desire to Learn* covers everything you need to know to change the dynamics of learning in your classroom or school: * A comprehensive overview of the research on internal motivation; * Case studies of strategies for activating internal motivation at the elementary, middle, and high school levels; * Suggestions on how to assess degrees of student motivation; and *Motivating students is not the issue—the hunger to learn is ever-present*. Yet schools continue to insist on the traditional reward-punishment model, to the detriment of student achievement. Clearly it's time for change. This engaging and thought-provoking book will help you create a culture of achievement by building on the inherent drive to succeed that students bring to the classroom every day.

Surveying Sixth Edition is designed to cover the standard topics in a basic surveying course in a streamlined manner, meeting the learning needs of today's student. This text provides comprehensive yet concise coverage of the essential skills necessary in surveying and civil engineering, such as measurement, distance corrections, leveling, angles, area computation, computer calculations, topographic surveying, electronic distance measuring instruments, and construction surveying. The text includes photos and diagrams, lists of useful addresses and degree programs, surveying tables, and formulas. New co-authors Wayne A. Sarasua and William J. Davis bring a fresh perspective to this classic text. This text

is suitable for students in a one-semester course at two and four-year colleges taking their first course on surveying.

Innovative text focusing on engine design and fluid dynamics, with numerous illustrations and a web-based software tool.

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

Here is the book that exposed the Daimler-Chrysler "merger of equals" as a bold German takeover of an industrial icon. Taken for a Ride reveals the shock waves felt around the world when Daimler-Benz bought Chrysler for \$36 billion in 1998. In a gripping narrative, Bill Vlasic and Bradley A. Stertz go behind the scenes of the defining corporate drama of the decade -- and in a new epilogue chart its chaotic aftermath.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
