ST(P) Mathematics offers very useful support to teachers and pupils through the PoS for Key Stages 3 and 4. Sufficient text is given for pupils to use as a reminder of the main results and methods. Each book offers an ample supply of exercises to consolidate work covered by investigation, project, class discussion, class teaching etc.

A GRADED COURSE FOR KS 3 & 4 LEADING TO GCSE - KS 4 A BOOKS - designed for pupils working towards Level 7 - 8 at KS3, and higher tiers at GCSE. ST(P) Mathematics offers very useful support to teachers and pupils through the PoS for Key Stages 3 and 4.

This new edition of the best-selling STP Mathematics series provides all the support you need to deliver the 2014 KS3 Programme of Study. These new student books retain the authoritative and rigorous approach of the previous editions, whilst developing students' problem-solving skills, helping to prepare them for the highest achievement at KS4. These student books are accompanied by online Kerboodle resources which include additional assessment activities, online digital versions of the student books and comprehensive teacher support.

Part of the ST(P) graded series in mathematics for Key Stages 3 and 4, leading to GCSE. Each book offers a supply of exercises to consolidate work covered by investigation, project, class discussion and class teaching. A corresponding book of teacher's notes is also available.

A popular resource written by best-selling authors and completely in line with National Curriculum for 2001.

ST(P) Mathematics offers very useful support to teachers and pupils through the PoS for Key Stages 3 and 4. Sufficient text is given for pupils to use as a reminder of the main results and methods. Whenever possible, the recommended technique is to give the pupils a starting point from which they can find out mathematical properties for themselves. Each book offers an ample supply of exercises to consolidate work covered by investigation, project, class discussion, class teaching etc. A separate Teacher's Notes and Answers book is published for each Pupils' Book in year 1 - 4 and Book 5C. Answers are included in Books 5A and 5B.

About the Book: This book Engineering Mathematics-II is designed as a self-contained, comprehensive classroom text for the second semester B.E. Classes of Visveswaraiah Technological University as per the Revised new Syllabus. The topics included are Differential Calculus, Integral Calculus and Vector Integration, Differential Equations and Laplace Transforms. The book is written in a simple way and is accompanied with explanatory figures. All this make the students enjoy the subject while they learn. Inclusion of selected exercises and problems make the book educational in nature. It should.

This volume continues the work covered in Core Maths or Mathematics - The Core Course for Advanced Level to provide a full two-year course in Pure Mathematics for A-Level.

Written as a supplement to Marcel Berger ' s popular two-volume set, Geometry I and II (Universitext), this book offers a comprehensive range of exercises, problems, and full solutions. Each chapter corresponds directly to one in the relevant volume, from which it also provides a summary of key ideas. Where the original Geometry volumes tend toward challenging problems without hints, this book offers a wide range of material that begins at an accessible level, and includes suggestions for nearly every problem. Bountiful in illustrations and complete in its coverage of topics from affine and

projective spaces, to spheres and conics, Problems in Geometry is a valuable addition to studies in geometry at many levels.
