this has been shown again and again in the past few years. Against this background, the aspect of supply continuity is of increasing importance for all activities that relate to procurement, logistics, and supply chain management. Its objective is to ensure the continuous operation of supply chains, i.e., the uninterrupted flow of material, information, and coordination from the initial supplier to the end customer. Therefore, it is necessary to adopt adequate measures that take into consideration not only potential losses but also potential gains (so-called speculative risks). With
