This comprehensive four volume set includes all major contributions to the field of international business. It also includes key writings in the areas of international political economy and on regional and national issues.

This volume fills a gap in the international business literature, offering the perspectives of researchers who are deeply embedded in one key emerging market, India. With the global economy changing dramatically, firms from emerging markets are playing increasingly important roles in both outward and inward internationalisation. International Business Strategy offers profound

insights into international business activities in this rapidly-evolving environment, in which multinational corporations from emerging markets are now influential players. Reflecting the complex nature of India itself, the chapters employ a variety of theoretical lenses to shed light on a wide range of issues encountered by Indian businesses, from some of the world's largest corporations to small, entrepreneurial firms.

Intelligent Decision Technologies (IDT) seeks an interchange of research on intelligent systems and intelligent technologies which enhance or improve decision making in industry, government and academia. The focus is interdisciplinary in nature, and includes research on all aspects of intelligent decision technologies, from fundamental development to the applied system. This volume

This book explores the reasons for persistent differences in work practices both within and between industries. The authors found that the strategy that a firm chooses to follow often determines the kind of work practices it fosters. Therefore a firm may not adopt the approach now advocated by many management thinkers--in which decision-making is pushed down to the lowest level of the firm--because this choice may not be consistent with its competitive strategy. The authors discuss the ways that public policy can aid workers without subverting the strategic choices made by firms.

Marketing Strategy strips away the confusion and jargon that surround what ought to be one of the most straightforward areas of modern business. Marketing and strategy are about relationships between people and this is brought clearly into focus in the text. The marketing practitioner will find this an accomplished book on the role of the marketing director in the successful organization of the year 2000 and beyond. Managers, outside that specialism will be able to understand the pivotal role of marketing in the business strategy process while students will value the bridge it creates between academic theory and practical implementation of marketing in an increasingly competitive environment. Key aims of the book are: \* developing a business strategy \* devising a marketing strategy \* implementing a marketing strategy

Multinational enterprises must contend with increasingly challenging conditions in the international business environment. This Handbook explores how classic principles of international competitive strategy are transformed in today's markets and provides suggestions on how firms can develop effective strategies to respond to these transformations.

This volume brings together various emerging perspectives in strategy research for further interaction and debate. Contributions address a range of issues related to the globalization of strategy research and chapters examine strategy theory, methods and research as well as strategy as practice, discourse and reflexive design.
