This is a practical guide to designing and using oral tests of language ability. It is for teachers, testers, course designers and educational planners. The organisation follows the sequence of stages in which a new testing programme would logically be carried out. It takes the reader through the testing process, giving practical examples and discussing the issues involved at each stage.

a Handbook of Oral ...

Latent trait estimates of rater reliability in the International English Language Testing System (IELTS). Australian Review of Applied Linguistics, Vol. 13, Issue. 2, p. Australian Review of Applied Linguistics, Vol. 13, Issue. 2, p.

"The identification of language problems and subsequent evaluation of interventions depend in part on the availability of useful and psychometrically robust assessments to determine the nature and severity of their problems and monitor progress. The purpose of these assessments may be to measure a child's language proficiency, that is, how they perform relative to other children and whether they have the

File Type PDF Testing Spoken Language A

language level expected and needed for schooling, or they may have a specifically clinical purpose, to identify the occurrence and nature of a disorder. The purpose of assessment is key to the aspects of language targeted in an assessment and the methods used to target these. In the case of spoken English, there are many language assessments ranging from broad language tests to more narrowly focused measures, reflecting the complexity of the language system and its use"--

The evaluation of student performance and knowledge is a critical element of an educator's job as well as an essential step in the learning process for students. The quality and effectiveness of the evaluations given by educators are impacted by their ability to create and use reliable and valuable evaluations to facilitate and communicate student

File Type PDF Testing Spoken Language A

learning. The Handbook of Research on Assessment Literacy and Teacher-Made Testing in the Language Classroom is an essential reference source that discusses effective language assessment and educator roles in evaluation design. Featuring research on topics such as course learning outcomes, learning analytics, and teacher collaboration, this book is ideally designed for educators, administrative officials, linguists, academicians, researchers, and education students seeking coverage on an educator's role in evaluation design and analyses of evaluation methods and outcomes.

Language testers have generally come to

File Type PDF Testing Spoken Language A

recognize the limitations of traditional statistical methods for validating oral language tests. They have begun to consider more innovative approaches to test validation, approaches that promise to illuminate the assessment process itself, rather than just assessment outcomes (i.e., ratings). One such approach is conversation analysis (or CA), a rigorous empirical methodology developed by sociologists, which employs inductive methods in order to discover and describe the recurrent, systematic properties of conversation, including sequential organization, turn-taking, repair, preference structure, and topic management. CA offers a systematic approach for analysing spoken interaction from a qualitative perspective, allowing one to make observations about a stretch of talk while at the same time interacting with it. This book provides language

File Type PDF Testing Spoken Language A

testers with a background in the conversation analytic framework and a fuller understanding of what is entailed in using conversation analysis in the context of oral language test validation.

This 2nd edition includes a new chapter on testing young learners and features expanded chapters on common test techniques and testing overall ability. There is also an additional appendix on item banking and a revised appendix on statistical analysis of test data.

"The Cambridge Guide to Second Language Assessment aims to present in one volume an up-to-date guide to the central areas of assessing the second language performance of English by speakers of other languages. This volume provides snapshots of significant issues and trends that have shaped language

File Type PDF Testing

Spoken Language A

assessment in the past and highlights the current state of our understanding of these issues"--

Handbooks For Language Teachers

Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second

File Type PDF Testing Spoken Language A

language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities

File Type PDF Testing Spoken Language A

associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users.
