In Discourse and Power in a Multilingual World the discourse of politicians and policy-makers in Britain links languages other than English, and therefore speakers of these languages, with civil disorder and threats to democracy, citizenship and nationhood. These powerful arguments travel along ‘ chains of discourse ’ until they gain the legitimacy of the state, and are inscribed in law. The particular focus of this volume is on discourse linking ‘ race riots ’ in England in 2001 with the Nationality, Immigration and Asylum Act 2002, which extended legislation to test the English language proficiency of British citizenship applicants. Adrian Blackledge develops a theoretical and methodological framework which draws on critical discourse analysis to

This book advances a model for the analysis of contemporary satirical humour. Combining a range of theoretical frameworks in stylistics, pragmatics and discourse analysis, Simpson examines both the methods of textual composition and the strategies of interpretation for satire.

Verbal Irony is central to the model, in respect of which Simpson isolates three principal “ ironic phases ” that shape the uptake of satirical humour. Throughout the book, consistent emphasis is placed on satire ’ s status as a culturally situated discursive practice, while the categories of the model proposed are amply illustrated with textual examples. A notable feature of the book is a chapter on the legal implications of using satirical humour as a weapon of attack in the public domain. A book where Jonathan Swift meets Private Eye magazine, this entertaining and thought-provoking study will interest those working in stylistics, humorology, pragmatics and discourse analysis. It also has relevance for forensic discourse analysis, and for media, literary and

Creole languages are characteristically associated with a negative image. How has this prestige been formed? And is it as static as the diglossic situation in many anglo-creolophone societies seems to suggest? classification as a (socio)linguistic type to scrutiny and critical debate. In its analysis of rich empirical data this study also demonstrates that the uses, functions and negotiations of Creole within particular social and linguistic practices have shifted considerably. Rather than limiting its scope to one "national" speech community, the discussion focusses on changes of the social meaning of Creole in various discursive fields, such as inter generational changes of Creole use in the London Diaspora, diachronic changes of Creole representation in written texts, and diachronic changes of Creole representation in translation. The study employs a discourse analytical approach drawing on linguistic models as well as Foucauldian theory.

Theories of discourse bring to realism new ideas about how knowledge develops and how representations of reality are influenced. We gain an understanding of the conceptual aspect of social life and the processes by which meaning is produced. This collection reflects the growing interest realist critics have shown towards forms of discourse theory and deconstruction. The diverse range of contributions address such issues as the work of Derrida and deconstruction, discourse theory, Eurocentrism and poststructuralism. What unites all of the contributions is a sense that it is essential to provide a realist alternative to the hitherto dominance of social constructionism, hermeneutics and postmodernism, over many of the issues discussed. By developing a realist perspective the

And different authors attempt to embed discourse within the structured nature of the reality of the world. Realism can situate language, discourse and ideology within context specific, or 'causally efficacious' circumstances. Realism can help to uncover issues of power, representation, and subjectivity and how discursive and other social practices produce real effects. This can help us understand the manner in which (non-discursive) social structures are reproduced through various forms of ideology and discourse. And by knowing this, we can start to address questions concerning human emancipation and how the world is to be transformed.
