The Approaching Great Transformation: Toward a Livable ...

"The Approaching Great Transformation is a breath of fresh air in a world of hackneyed nonsolutions to our social and economic problems. Professor Magnuson pulls no punches regarding the coming collapse of the corporate-commercial-consumer society, or the inability of technological fixes and 'green capitalism' to bail us out of the historical crunch that is virtually upon us.

The Approaching Great Transformation - Divination Foundation

About this Research Topic. Multiple socio-ecological crises require a great transformation towards sustainability. Environmental psychology and education have traditionally approached sustainability-related learning and behavior on an individual level. Various theories from social and behavioral psychology and the learning sciences have been applied to understand the awareness, motivational, and normative aspects underlying the ecologically and socially responsible use of resources.
