timbers of old buildings. The adult beetle is brown and measures on average 7 mm (0.3 in) long. Eggs are laid in dark crevices in old wood inside buildings, trees, and inside tunnels left behind by previous larvae.

~~Deathwatch beetle - Wikipedia~~

# Bookmark File PDF The Death Watch Beetle An

The Deathwatch beetle is a medium-sized beetle. The larvae live in dead wood, in old trees and in buildings: their tunnelling can cause major damage to wood beams and floors, and to wooden furniture.

Adults emerge during the spring, leaving holes of about 4mm across in the wood.

The adults make tapping noises against the
