Essential Guide for the Newly

Diagnosed  
Scleroderma is an uncommon condition that results in hard, thickened areas of skin and sometimes problems with internal organs and blood vessels.

Scleroderma is caused by the immune system attacking the connective tissue under the skin and around internal organs and blood vessels. This causes scarring and thickening of the tissue in these areas.

## Scleroderma - NHS

Early diagnosis of scleroderma is very important. Read on to learn more! ... (i.e., Raynaud ' s without any underlying autoimmune condition). Primary Raynaud ' s typically first appears during one ' s teens or early adulthood. People
