Heart attack symptoms vary by gender. Wednesday 22 February 2012. "Heart attack symptoms differ in women," BBC News has today reported. The broadcaster says that women having a heart attack are less likely to experience chest pain, compared with men. A heart attack can cause a range of different symptoms, from crushing chest pains to tingling in the limbs, and feelings of breathlessness or nausea.

[Heart attack symptoms vary by gender - NHS](#)

In general, heart disease treatment in women and in men is similar. It can include medications, angioplasty and stenting, or coronary bypass surgery. Women are less likely to be prescribed statin therapy to prevent future heart attacks than are men. However, studies show the benefits are similar in both groups.
