This book introduces students to the essential questions of the law of armed conflict and international humanitarian law.

The law of armed conflict is a key element of the global legal order yet it finds itself in a state of flux created by the changing nature of warfare and the influences of other branches of international law. The Routledge Handbook of the Law of Armed Conflict provides a unique perspective on the field covering all the key aspects of the law as well as identifying developing and often contentious areas of interest. The handbook will feature original pieces by international experts in the field, including academics, staff of relevant NGOs and (former) members of the armed forces. Made up of six parts in order to offer a comprehensive overview of the field, the structure of the handbook is as follows: Part I: Fundamentals Part II: Principle of distinction Part III: Means and methods of warfare Part IV: Special protection regimes Part V: Compliance and enforcement Part VI: Some contemporary issues Throughout the book, attention is paid to non-international conflicts as well as international conflicts with acknowledgement of

the differences. The contributors also consider the relationship between the law of armed conflict and human rights law, looking at how the various rules and principles of human rights law interact with specific rules and principles of international humanitarian law in particular circumstances. The Routledge Handbook of the Law of Armed Conflict provides a fresh take on the contemporary laws of war and is written for advanced level students, academics, researchers, NGOs and policy-makers with an interest in the field.

Written by a team of distinguished and internationally renowned experts, this Oxford Handbook gives an analytical overview of international law as it applies in armed conflicts. The Handbook draws on international humanitarian law, human rights law, and the law of neutrality to provide a comprehensive picture of the status of law in war.

This book offers the most authoritative commentary and analysis of international humanitarian law applicable in armed conflict available. It is based upon the Joint Service Regulation for the German Ministry of Defence, augmented with extensive international references, and accompanied by commentary by a team of distinguished and internationally renowned experts. Whilst the past decades have seen consistent development of international law applicable in armed conflict, culminating in a series of International Covenants and Protocols, world events in recent years have made reassessment of the law both a timely and topical concern. This Handbook available for the first time in paperback will serve as an indispensable reference source for practising lawyers and academics working in the field of international humanitarian law and for military personnel worldwide.

The Law of Armed Conflict provides a complete operational scenario and introduction to the operational organization of United States forces. The focus remains on United States law perspective, balanced with exposure to areas where the interpretation of its allied forces diverge. Jus ad bellum and jus in bello issues are addressed at length. The casebook comes to students with stunning authority. All of the authors are active or retired United States Army officers with more than 140 years of collective military operational experience among them. Several have experience in both legal and operational assignments as well. They deliver a comprehensive coverage of all aspects of the law of armed conflict, explaining the difference between law and policy in regulation of military operations.

armed conflict, this book fills that gap. Part 1 of the volume details foundational information relating to international human rights law and human rights institutions, the types of operations that States' armed forces engage in, and how the law of armed conflict and international human rights law apply to regulate different situations. Part 2 provides practical guidance as to the legal regulation of specific situations, including discussion of the conduct of hostilities, detention operations, humanitarian assistance, cyber operations, and investigations. This book is the result of an in-depth process involving both academic and practitioner experts in the law of armed conflict and international human rights law who were convened in meetings at Chatham House chaired by Elizabeth Wilmshurst, Distinguished Fellow at Chatham House. The group included Professor Françoise Hampson, Essex University; Professor Dapo Akande, Oxford University; Charles Garraway, Fellow at Essex University; Professor Noam Lubell, Essex University; Michael Meyer, British Red Cross; and Daragh Murray, Lecturer at Essex University.

Modern armed conflict has taken a variety of forms and occurs at a variety of levels, raising serious questions concerning the relationship between the law of armed conflict and the reality of contemporary warfare. Many contemporary armed conflicts are fought in pursuit of unlimited objectives, whereas other modern wars seek to advance limited goals. While in some cases modern wars are fought by traditional armies composed of clearly identifiable soldiers, often modern armed conflicts are waged by guerrilla or partisan fighters whose identities are easily confused with non-combatants. Terrorism is increasingly a characteristic manifestation of this contemporary warfare. In the broadest sense, contemporary warfare has raised often controversial and vexing questions concerning the applicability of the law of armed conflict and, when applicable, the interpretation of its principles and tenets. This engaging volume addresses some of the contemporary normative and legal challenges and problems
