Organization of work may have begun before the evolution of Homo sapiens. Along with tools, a more complex brain structure, and linguistic communication, the division of labour (job specialization) may have been responsible for starting the human conquest of nature and differentiating human beings from other animal species.

The History of labour law in the United Kingdom concerns the development of UK labour law, from its roots in Roman and medieval times in the British Isles up to the present. Before the Industrial Revolution and the introduction of mechanised manufacture, regulation of workplace relations was based on status, rather than contract or mediation through a system of trade unions.
