A lyrical, poetic text explores the features of the planets and compares them to the gods of old who are their namesakes. Though many of the planets were named long before we had good scientific information about them, Mitton draws readers attention to some amazing coincidences. The veiled goddess Venus lends her name to a cloud-shrouded planet. The blue, stormy planet Neptune is named for the god of the sea. The Planet Gods brings together for the first time the myths and truths of space ...
