Featuring contributions from a diverse set of experts, this thought-provoking book offers a visionary introduction to the computational turn in law and the resulting emergence of the computational legal studies field. It explores how computational data creation, collection, and analysis techniques are transforming the way in which we comprehend and study the law, and the implications that this has for the future of legal studies.

Timed to be launched at 2009 General Convention, Juan Oliver definitive look at the history and potential future of Latino ministry in the Episcopal Church comes at an opportune time. With Latino ministries growing around the country in all traditions, and with increasing resource and programmatic offerings being allocated to serve those communities, this highly descriptive handbook profiles the culture, faith, and importance of this emerging minority. Within the book chapters, Oliver surveys topical areas, such as: Who/What is a Latino? Latino Biblical Interpretation Worship in a Latino congregation The spiritual lives of Latinos Latino authority and governance Latino administration and stewardship The Latino priest: Factotum or Specialist? The Latino deacon The Latino bishop Non-Latinos in Latino ministry

"The Church cannot be understood without women..." - Pope Francis, July 28, 2013 In the new book Promise and Challenge, ten diverse Catholic women -- theologians, philosophers, attorneys, and an economist -- answer Pope Francis' call to address the deeper questions about the meaning of womanhood and the role of women in the Church. Based on their presentations at the 2014 Symposium on Women in the Church, these women help move the conversation forward through their intriguing insights and analysis of established teachings and traditions combined with original scholarship and new ideas. Through their personal experience, spiritual depth, and professional expertise, you'll examine: Threshold issues and important context to expand the role of women in the Church Several important aspects of complementarity that require further theological development theologically Practical issues related to the place of women in the church The promise and challenge of the future With insight, clarity, and great love for the Church, these women touch on both the challenges of today and the promise of tomorrow for women in the Church.

Reinvention chronicles an unprecedentedly comprehensive approach to community college reform and the leadership challenges encountered along the way. As chancellor of the City Colleges of Chicago, Cheryl L. Hyman implemented an ambitious program of systemwide reform called Reinvention. The program's impressive achievements included doubled graduation rates, improved transfer rates, and streamlined connections between college and careers. Informed by leading research on effective community college programs, Reinvention emphasized a shift in focus from access to outcomes, putting the priority on student success. Hyman offers a wake-up call for community college leaders and those concerned with student success, arguing that a significant cultural and operational shift will be required for community colleges to fulfill this mission. The story of Reinvention--its failures as well as its nascent successes--offers an inspiration and a roadmap for those seeking to make change in higher education. "Hyman's fascinating book forces us to contemplate the possible speed of college change. What emerges are valuable lessons, deeply rooted in the author's fierce determination to promote social mobility. It's a must-read for anyone seeking to understand the essential relationships among college leadership, campus culture, and the critical goal of dramatically improving community college student success." --Joshua Wyner, founder and executive director, Aspen Institute College Excellence Program "Cheryl Hyman took the job of chancellor of Chicago City Colleges with a deep idealistic commitment to serving the low-income students striving to improve their lives. This book describes her vision, efforts, and the ways she transformed the system. Her efforts are inspiring and instructive to all who want to improve educational opportunity in the United States." --James Rosenbaum, professor of sociology, education and social policy, Northwestern University Cheryl L. Hyman is the former chancellor of City Colleges of Chicago. Davis Jenkins is a senior research scholar at the Community College Research Center at Teachers College, Columbia University.

Covers the latest methodologies and research on international comparative surveys with contributions from noted experts in the field Advances in Comparative Survey Methodology examines the most recent advances in methodology and operations as well as the technical developments in international survey research. With contributions from a panel of international experts, the text includes information on the use of Big Data in concert with survey data, collecting biomarkers, the human subject regulatory environment, innovations in data collection methodology and sampling techniques, use of paradata across the survey lifecycle, metadata standards for dissemination, and new analytical techniques. This important resource: Contains contributions from key experts in their respective fields of study from around the globe Highlights innovative approaches in resource poor settings, and innovative approaches to combining survey and other data Includes material that is organized within the total survey error framework Presents extensive and up-to-date references throughout the book Written for students and academic survey researchers and market researchers engaged in comparative projects, this text represents a unique collaboration that features the latest methodologies and research on global comparative surveys.

The land was one of the most vibrant symbols for the people of ancient Israel. In the land-gift, promise, and challenge--was found the physical source of Israel's fertility and life, and a place for the gathering of the hopes of the covenant people. In this careful treatment, Walter Brueggemann follows the development of his theme through the major blocks of Israel's traditions. The book provides a point of entrance both to the theology of the Old Testament and to aspects of the New Testament--even as it illuminates crucial issues of the contemporary scene. In this fully revised version, Brueggemann provides new insights, as well as updating the discussion, notes, and bibliography.
