Everybody is busy, busy, busy. They have no time to stop and listen to each other. With some hard work and patience, the children create a meal that their whole community can enjoy, finding friendship along the way. With growing concerns around mental health, and in the wake of a period of uncertainty and change, it is more important than ever to pay attention to how young children express their emotions, and to teach them to articulate their thoughts in a healthy way. This beautifully illustrated picture book has been created to help children understand the importance of having someone to listen to you. Children are encouraged to think about how characters might be feeling at different points in the story and think about what makes the characters feel valued. When it comes to child and adolescent mental health issues, prevention and early intervention are key. The 'serve and return' format of this book provides a virtual space where children can explore thoughts and feelings, teaching them that they have a place in their community.

The characters in this book communicate in different ways. Can you work out what they mean through their voices, gestures and expressions? With growing concerns around mental health, and in the wake of a period of uncertainty and change, it is more important than ever to pay attention to how young children express their emotions, and to teach them to articulate their thoughts in a healthy way. This beautifully illustrated picture book has been created to teach children about the importance of communication, both in finding their own 'voice' and listening to others, however they communicate. By demonstrating how easy it can be to interpret a non-verbal communication system, it encourages children to notice and talk about non-verbal cues, giving them the opportunity to actively listen and reassuring them that they will be listened to. When it comes to child and adolescent mental health issues, prevention and early intervention are key. The 'serve and return' format of this book provides a virtual space where children can explore thoughts and feelings, teaching them that they can feel safe and heard.

'a picture is worth a thousand words'. Sometimes Christian discourse can be smothered by endless prose, which demands much inferential reasoning. There is, however, a contrary argument. An isolated visual representation can be misleading if it is improperly interpreted. For example, some mystical visions are interpreted as direct instructions from the Holy Spirit, as happened with the Radical Reformers, who advocated the Peasants' Revolt. Hence theories of symbol, metaphor, and visual representation must be examined Part Two discusses visual representation in the Old Testament, the teaching of Jesus, pictures and analogies in Paul, and the Book of Revelation. This shows the range of authentic visual representations. In contrast to biblical material, we find throughout Christian history abundant examples of misleading imagery which is often passed off as Christian. A notorious example is found in the visual representation and metaphors used by Gnostic writers. Almost as bad are some visual representations used by the medieval mystics, Radical Reformers, and extreme charismatics – all of which lack valid criteria of interpretation, relying instead on subjective conviction. Similarly, sermons and prayers today can be enriched with pictorial images, but some can be misleading and unhelpful for the life of the Church.

This beautifully illustrated picture book helps children understand the 'journey' in thinking, exploring the ways in which collaborating, experimenting and changing ideas can open new possibilities. By learning to reframe their memories, children learn that change and transition don't have to be bad things.

Enigmatic drawings invite the reader to invent his or her own stories to explain each scene.
