At the center of this is not only clear decisive leadership of the CPC, but also a team of civil servants and bureaucrats that ... a precious source of Chinese wisdom, where developing countries ...

100 years of fortitude

At the center of this is not only clear decisive leadership of the CPC, but also a team of civil servants and bureaucrats that ... a precious source of Chinese wisdom, where developing countries ...

For those who could read between the lines, the censored news out of China was terrifying. But the president insisted there was nothing to worry about. Fortunately, we are still a nation of skeptics. Fortunately, there are those among us who study pandemics and are willing to look unflinchingly at worst-case scenarios. Michael Lewis's taut and brilliant nonfiction thriller pits a band of medical visionaries against the wall of ignorance that was the official response of the Trump administration to the outbreak of COVID-19. The characters you will meet in these pages are as fascinating as they are unexpected. A thirteen-year-old girl's science project on transmission of an airborne pathogen develops into a very grown-up model of disease control. A local public-health officer uses her worm's-eye view to see what the CDC misses, and reveals great truths about American society. A secret team of dissenting doctors, nicknamed the Wolverines, has everything necessary to fight the pandemic: brilliant backgrounds, world-class labs, prior experience with the pandemic scares of bird flu and swine flu, everything, that is, except official permission to implement their work. Michael Lewis is not shy about calling these people heroes for their refusal to follow directives that they know to be based on misinformation and bad science. Even the internet, as crucial as it is to their exchange of ideas, poses a risk to them. They never know for sure who else might be listening in.

The United Fruit Company (UFCO) developed an unprecedented relationship with Guatemala in the first half of this century. By 1944, UFCO owned 566,000 acres, employed 20,000 people, and operated 968 of Guatemala's 719 miles of railroad, making the multinational corporation Guatemala's largest private landowner and biggest employer. In *Doing Business with the Dictators*, Paul J. Dosal shows how UFCO built up a profitable corporation in a country whose political system was known to be corrupt. His work is based largely on research of company documents recently acquired from the Justice Department under the Freedom of Information Act—no other historian researching this topic has looked at these sources. As a result, Dr. Dosal is able to offer the first documentary evidence of how UFCO acquired, defended, and exploited its Guatemalan properties by collaborating with successive authoritarian regimes.

Tremper Longman III and Peter E. Enns edit this collection of 148 articles by over 90 contributors on Job, Psalms, Proverbs, Ecclesiastes, Song of Songs, Lamentations, Ruth and Esther.

This is a comprehensive review of the psychological literature on wisdom by leading experts in the field. It covers the philosophical and sociocultural foundations of wisdom, and showcases the measurement and teaching of wisdom. The connection of wisdom to intelligence and personality is explained alongside its relationship with morality and ethics. It also explores the neurobiology of wisdom, its significance in medical decision-making, and wise leadership. How to develop wisdom is discussed and practical information is given about how to instill it in others. The book is accessible to a wide readership and includes virtually all of the major theories of wisdom, as well as the full range of research on wisdom as it is understood today. It takes both a basic-science and applied focus, making it useful to those seeking to understand wisdom scientifically, and to those who wish to apply their understanding of wisdom to their own work.

From the author of the international bestseller *Debt: The First 5,000 Years* comes a revelatory account of the way bureaucracy rules our lives Where does the desire for endless rules, regulations, and bureaucracy come from? How did we come to spend so much of our time filling out forms? And is it really a cipher for state violence? To answer these questions, the anthropologist David Graeber—one of our most important and provocative thinkers—traces the peculiar and unexpected ways we relate to bureaucracy today, and reveals how it shapes our lives in ways we may not even notice. Though he also suggests that there may be something perversely appealing—even romantic—about bureaucracy, leaping from the ascendance of right-wing economics to the hidden meanings behind Sherlock Holmes and Batman, *The Utopia of Rules* is at once a powerful work of social theory in the tradition of Foucault and Marx, and an entertaining reckoning with popular culture that calls to mind Slavoj Žižek at his most accessible. An essential book for our times, *The Utopia of Rules* is sure to start a million conversations about the institutions that rule over us—and the better, freer world we should, perhaps, begin to imagine for ourselves.

The Old Testament books of wisdom and poetry carry themselves differently from those of the Pentateuch, the histories or the prophets. The divine voice does not peal from Sinai, there are no narratives carried along by prophetic interpretation nor are oracles declaimed by a prophet. Here Scripture often speaks in the words of human response to God and God's world. The hymns, laments and thanksgivings of Israel, the dirge of Lamentations, the questionings of Qoheleth, the love poetry of the Song of Songs, the bold drama of Job and the proverbial wisdom of Israel all offer their textures to this great body of biblical literature. Then too there are the finely crafted stories of Ruth and Esther that narrate the silent providence of God in the course of Israelite and Jewish lives. This third Old Testament volume in IVP's celebrated "Black Dictionary" series offers nearly 150 articles covering all the important aspects of Job, Proverbs, Ecclesiastes, Psalms, Song of Songs, Lamentations, Ruth and Esther. Over 90 contributors, many of them experts in this literature, have contributed to the 'Dictionary of the Old Testament: Wisdom, Poetry and Writings'. This volume maintains the quality of scholarship that students, scholars and pastors have come to expect from this series. Coverage of each biblical book includes an introduction to the book itself as well as separate articles on their ancient Near Eastern background and their history of interpretation. Additional articles amply explore the literary dimensions of Hebrew poetry and prose, including acrostic, ellipsis, inclusio, intertextuality, parallelism and rhyme. And there are well-rounded treatments of Israelite wisdom and wisdom literature, including wisdom poems, sources and theology. In addition, a wide range of interpretive approaches is canvassed in articles on hermeneutics, feminist interpretation, form criticism, historical criticism, rhetorical criticism and social-scientific approaches. The 'Dictionary of the Old Testament: Wisdom, Poetry and Writings' is sure to command shelf space within arm's reach of any student, teacher or preacher working in this portion of biblical literature.

This book develops a sociological understanding of law making in the European Union. In particular, the book focuses on the social function of law in new governance structures promoting decentralized and flexible procedures that encourage deliberation, participation of stakeholders, and public dialogue. It pays attention to both the practical knowledge and the power relations underpinning law making, while seeking to bring to the foreground the importance of compromise in the process. The empirical substantiation of the argument discusses the regulation of technology in the European Union and is premised on case studies of governance of the Internet, patents of high technology, filters used on the Internet to block harmful material, trademark law and domain name dispute resolution by ICANN. To this effect, the book studies the dynamics of constructing a legal argument inside the European Commission, and its role in the process of coordinating the creation of networks, securing enforcement in self regulatory regimes, and steering activity on the part of autonomous groups of actors.

Continuing a Gold Medallion Award-winning legacy, this completely revised edition of *The Expositor's Bible Commentary* series puts world-class biblical scholarship in your hands. Based on the original twelve-volume set that has become a staple in college and seminary libraries and pastors' studies worldwide, this new thirteen-volume edition marshals the most current evangelical scholarship and resources. The thoroughly revised features consist of:

- Comprehensive introductions
- Short and precise bibliographies
- Detailed outlines
- Insightful expositions of passages and verses
- Overviews of sections of Scripture to illuminate the big picture
- Occasional reflections to give more detail on important issues
- Notes on textual questions and special problems, placed close to the texts in question
- Transliterations and translations of Hebrew and Greek words, enabling readers to understand even the more technical notes
- A balanced and respectful approach toward marked differences of opinion
