other reasons. Timber is quite in demand as it finds its use for making building material, furniture, and various other purposes.

What is Timber and What Are Various Uses of Timber ...
Timber species Wood is a natural material, and is sourced from many different tree species. Each species produces timber which varies in colour, density and performance properties, all of which will influence that species' suitability for a particular job. Tree species are broadly divided into two main groups: softwood and hardwood.
