Toys in Space II pdf - NASA

group of toys was flown on the STS-54 mission in January 1993. Dr. Summers, working with a multi-grade and subject area educational advisory group, selected the toys from hundreds of possibilities. This videotape is the record of the actions of those toys in microgravity. Teaching Strategy The Toys In Space II flight was conceived as an experiment in which the Shuttle crew members and the student viewers of the videotape would be co-

toys in space II - Space Acts

Mathematics. The educational video "Toys in Space II" was taped during the flight of STS-54. The video shows astronauts on the space shuttle and students back on Earth co-investigating the behavior of toys in space. Video program segments show the toys' behavior in 1 g (Earth's gravity) and then their behavior in the microgravity environment of space.

Title: toys in space II Created Date: 2/17/1999 1:32:41 PM

A very silly (not-too-scary) story about losing a beloved toy. That summer night, the toys were left outside. . . . For the very first time, the Wonderdoll, the helpful wind-up robot, the thoughtful green dinosaur, and the rest of their plucky gang lie in the grass, gazing up at the stars. But one star seems brighter than the rest. As it grows bigger and bigger, the toys realize it may not be a star at all! Soon they're venturing into the unknown, traveling by spaceship, where they meet a lonely alien in need of help, and some friends. From ever-inventive, award-winning author-illustrator Mini Grey comes a hilarious and heartfelt new adventure: a motley group of toys left outside in the garden become true friends and brave heroes--in space!

This program demonstrates the actions of a variety of children's toys in microgravity for classroom comparison with the actions of similar toys on Earth.

Presents a variety of activities using toys that illustrate the concepts of physics and simulate experiments performed during space shuttle missions

Shows and describes toy astronauts, robots, spacecraft, and aliens, and includes brief histories of space toy manufacturers

Explains how the space shuttle works and describes a shuttle trip from lift-off to touchdown.

This second edition of a resource designed to help teachers find relevant information on the Internet for both themselves and their students, provides concise reviews of more than 1,000 Web sites sorted by subject area. Each site is evaluated with one to five stars for content, presentation and grade level. Easy-to-follow explanations are

File Type PDF Toys In Space Ii A Tape For Physical Science And Science And Technology Resource Guide Liftoff To Learning

provided of how each site can be used in the classroom. Also presented are search tips to help teacher find more sites on their own. Besides the rating of Internet sites, the book includes information on hardware and software requirements, safety on the Internet, plug-ins, and helpful information such as criteria for site selection and searching the Web. An element called "Finding Where You Have Been" helps teachers relocate sites they have viewed. Other helpful features are "Searching the Web" and a "Glossary of Terms" to familiarize teachers and students with the Internet. The introductory material on "Safety on the Internet" provides guidelines for teachers. A generic Acceptable Use Policy is also included that is copyright-free for schools to adapt to their needs. Recommendations for filtering software are offered for Internet use in places where individual monitoring is not possible, such as libraries. Data is provided on an Internet license system in which parents or caregivers sign an agreement for their child to access the Internet. Sites are provided under the following curriculum areas: language arts; mathematics; science; foreign languages; general and professional sites for educators; health and physical education; information and communication; music and performing arts; technology in education; and visual arts.
