Understanding Storytelling Among African American Children: A Journey From Africa to America reports research on narrative production among African American children for the purpose of extending previous inquiry and discussion of narrative structure. Some researchers have focused on the influence of culture on the narrative structures employed by African American children; some have suggested that their narrative structures are strongly influenced by home culture; others posit that African American children, like children in general, produce narrative structures typically found in school settings. Dr. Champion contributes to previous research by suggesting that African American children do not produce one structure of narratives exclusively, but rather a repertoire of structures, some linked to African and African American, and others to European American narrative structures. Detailed analyses of narratives using both psychological text analysis and qualitative analysis are presented. An informative introduction provides background for the study, including a history of storytelling within the African American community. Part I offers a framework for understanding narrative structures among African American children. In Part II, evidence is presented that African American children produce a repertoire of narrative structures that are complex in nature. Part III connects the research findings to implications for educating African American children. Researchers, students, and professionals in the fields of literacy education, language development, African

Gathers fables, sermons, historical anecdotes, humorous tales, and modern raps and rhymes by Black storytellers

The story of America and African Americans is a story of hope and inspiration and unwavering courage. In Heart and Soul, Kadir Nelson's stirring paintings and words grace 100-plus pages of a gorgeous picture book—a beautiful gift for readers of all ages, a treasure to share across generations at home or in the classroom. Heart and Soul is about the men, women, and children who toiled in the hot sun picking cotton for their masters; it's about the America ripped in two by Jim Crow laws; it's about the brothers and sisters of all colors who rallied against those who would dare bar a child from an education. It's a story of discrimination and broken promises, determination, and triumphs. Kadir Nelson's Heart and Soul—the winner of numerous awards, including the Coretta Scott King Author Award and Illustrator Honor, and the recipient of five starred reviews—is told through the unique point of view and intimate voice of a one-hundred-year-old African-American female narrator. This inspiring book demonstrates that in striving for freedom and equal rights, African Americans help our country on the journey toward its promise of liberty and justice—the true heart and soul of our nation.

A collection of folktales from the African-American oral tradition, presented as they have been told by professional black storytellers from Rhode Island to Oklahoma.

This research-based book foregrounds Black narrative traditions and honors alternative methods of data collection,

analysis, and representation. Toliver presents a semi-fictionalized narrative in an alternative science fiction setting, refusing white-centric qualitative methods and honoring the ways of the griots who were the scholars of their African nations. By utilizing Black storytelling, Afrofuturism, and womanism as an onto-epistemological tool, this book asks readers to elevate Black imaginations, uplift Black dreams, and consider how Afrofuturity is qualitative futurity. By centering Black girls, the book considers the ethical responsibility of researchers to focus upon the words of our participants, not only as a means to better understand our historic and current world, but to better situate inquiry for what the future world and future research could look like. Ultimately, this book decenters traditional, white-centered qualitative methods and utilizes Afrofuturism as an onto-epistemological tool and ethical premise. It asks researchers to consider how we move forward in data collection, data analysis, and data representation by centering how Black girls reclaim and recover the past, counter negative and elevate positive realities that exist in the present, and create new possibilities for the future. The semi-fictionalized narrative of the book highlights the intricate methodological and theoretical work that undergirds the story. It will be an important text for both new and seasoned researchers interested in social justice. Informed and anti-racist researchers will find Endarkened storywork a useful tool for educational, cultural, and social critiques now and in the future.

Understanding Organization Through Culture and Structure: Relational and Other Lessons From the African American Organization presents an innovative view of organizations and the communication processes that constitute them. Arguing that human beings are communicatively embedded in their cultures, Anne Maydan Nicotera and Marcia J. Clinkscales, working with Felicia R. Walker, examine issues concerning task and relational orientations and the ways they and other cultural dimensions connect with organizational structure and function for predominantly African American organizations. Utilizing the results of their own research on organizations, they develop a set of humanistically-based models that illustrate how hidden cultural processes suffuse organizational life and are manifest through communication. Emphasizing the development of alternative theories and models of organizing which are rooted in African-American culture, such as team-based versus hierarchy-based interactions, this book explores such organizational functions as leadership and management, power, authority and control, communication and interpersonal dynamics, and cultural identity and human development. Applying their findings in a broader analysis of contemporary practices in organizational restructuring, the authors present research that serves as the foundation for generating several emergent models with significant implications for organizational systems. Understanding Organization Through Culture and Structure stimulates and inspires current researchers of organizational communication, and is certain to raise greater awareness of the operation of culture in organizing. The text is intended for scholars and students in organizational communication, management, organizational psychology, African studies, and related areas.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't

listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

How do children acquire language? How does real life language acquisition differ from results found in controlled environments? And how is modern life challenging established theories? Going far beyond laboratory experiments, the International Handbook of Language Acquisition examines a wide range of topics surrounding language development to shed light on how children acquire language in the real world. The foremost experts in the field cover a variety of issues, from the underlying cognitive processes and role of language input to development of key language dimensions as well as both typical and atypical language development. Horst and Torkildsen balance a theoretical foundation with data acquired from applied settings to offer a truly comprehensive reference book with an international outlook. The International Handbook of Language Acquisition is essential reading for graduate students and researchers in language acquisition across developmental psychology, developmental neuropsychology, linguistics, early childhood education, and communication disorders.
