## ~~Wind direction, Map: United Kingdom : Current weather~~

There are basically four elements of weather that can help describe weather. The four elements include wind, temperature, air pressure and moisture. Discuss with students each of the elements. An anemometer measures wind speed; a thermometer measures temperature; a barometer measures air pressure; and rain gauge measures moisture.

## ~~Discovering the Four Elements of Weather~~

The six basic elements of weather include temperature, humidity, atmospheric pressure, wind, precipitation and cloudiness. When combined, these elements can describe the weather conditions extant. Temperature is simply a measurement of the atmosphere in terms of heat or cold.
