When should you break the rules of percentage doubles? Percentage doubles is winning doubles. From the pros to recreational players, the teams that win most often are almost always the teams that...

You want to amp up your doubles game. Maybe you want to win your Saturday morning match more than once a month, or you're slipping down the pecking order on your league team. What do you do? If you're like most recreational players, you double down on improving your strokes. You sign up for lessons, serve buckets of balls, and drill your backhand. While all of these steps are good and will help your game, you won't see the results you're looking for as quickly as you would like. Doubles is much more than the sum of your strokes. While you want to have some combination of a steady serve, consistent return, decent volley, reliable lob, dependable overhead, and good groundstrokes, you also have the twin challenges of playing with a partner and facing two opponents on the other side of the net. The better-and faster-way to start winning more is to improve your match strategy. Rather than focusing on to hit the ball, concentrate on the where, when, and why you're hitting it. Strategy is so important in doubles because you are playing as a team. All of us have been in those situations where your partner and you are each individually better than either of your opponents, but they beat you every time because they play together. They move as one, cutting off your angles. They always seem to be at the net, keeping you on the defensive. And they appear to know where you are going to hit the ball, waiting there to put it away. You can be one of those players. While there are numerous doubles strategies, the most effective for recreational players is to avoid unforced errors. In recreational doubles, eight out of every ten points are decided by unforced errors. Entire games can roll by without any of the players hitting a winner. The primary cause of unforced errors is trying to do too much with the ball. You hit your first serve too hard and it plows straight into the net. You drive your return down the line and it lands wide. You smash your overhead and it hits the back fence on the fly. When you play strategically, you don't have to try that hard. On every point, depending on where the four players are on the court, there are a limited number of correct shots to hit-often only one-and a correct position to take following your shot. Here's an example. You're receiving serve in the ad court. The server has spun the serve wide to your backhand, pulling you outside the doubles sideline. You may have the urge to drive the ball down the line, but that would be a high-risk shot even if there weren't an opponent standing at the net. You might try a sharply angled cross-court sliced return, but from that depth, you will be hard pressed to keep the ball in the court. And, if you do, the server will likely be well-positioned to hit a volley into the court that you've vacated. The right shot-really the only one-is to lift a lob over the net player's head. You remove her from the equation and force her-and maybe the server-to retreat from the net. With one shot, you steal the serving team's advantage and give your team the opportunity to take the offensive. On the following pages, you will learn how to adapt the concepts of strategic tennis to every situation you face on the doubles court. We will also look at the importance of playing with the right partner, the need for constant and constructive communication between partners, and how developing a shared strategy can give your team an almost unassailable advantage in most recreational doubles matches. Improving your tennis strokes significantly can take months or even years. Improving your tennis strategy enough to start winning the matches you're now losing takes only a few weeks. Knowing where to hit the ball and where to move will have a bigger impact on your game than adding a few miles per hour to your serve or working on your drop volley.

This book is not about how to hit the tennis ball. It's about where to hit the ball, when, and why. It focuses on playing tennis strategically, which is the quickest and best way to raise your game to the next level. For recreational players, developing a strategic approach to the game is the single, most transformative step you can take. In this book, you will learn how to take advantage of the strengths in your game, how to minimize your weaknesses, and how to attack your opponent's game. Most tennis players start by focusing on the mechanics of their strokes. That makes sense. If you can't hit the ball over the net and inside the lines, the rest doesn't really matter. Later, when you're hitting the ball well, it's fun to keep working on your shots. All tennis players love to hit the ball. Unfortunately, stroke improvement has a diminishing return. Early on you improve rapidly, but then the pace levels off. It can be frustrating to work, week after week, month after month, and not see any progress. Developing your strategic understanding of the game completely changes that dynamic. It's difficult to exaggerate how much focusing on strategy can improve every aspect of your game. At first glance, tennis is a marvelously simple game. All you have to do is hit the ball over the net and inside the lines one time more than your opponent does and you win the point. Do that often enough and you win the match. In truth, however, tennis is endlessly complex. That's why it becomes a lifetime passion for so many of us. It's a demanding amalgamation of muscle memory, hand-eye coordination, geometric understanding, stamina, and split-second decision making. Adding another layer of complexity, most of us model our games on professional tennis players. We see them win points by smacking the felt off the ball, going for the lines, serving aces, and hitting topspin lobs from outside the doubles alley. We want to play like that. The catch is we don't have unbelievable hand-eye coordination and don't practice eight hours a day. Is it any wonder, then, that about 80 percent of points in a recreational match end with an unforced error? That's right. Eight out of 10 points-and often more-end because you or your opponent hit the ball into the net or outside the lines. When we come out of top in a match, we like to think that we won. It's probably more accurate to say that we didn't lose. At the core of strategic success at the recreational level is reducing unforced errors. Cutting them by just one or two per set can lead to an exponential leap in matches won. This book are filled with strategies and tactics that you can adopt and adapt to improve your game. You don't need to apply all of them; use only the concepts that work for you. If altering the strategies better suits your game, go for it. Playing strategically will make your game more consistent. You'll become a better competitor, and you'll have more fun.

If you love tennis and you live to play doubles, this Double Strategies was written for you. Whether you're a beginner or an experienced player, I'm sure the tips in this book are going to be a huge boon to your doubles game. Perhaps you play doubles often, but with no clear idea of how to finish points. I'm going to show you how to construct and win points in doubles.
