software for Weeke/Homag CNC machine centers. I worked in two shops that used that system and one could not get.dxf import to work for them straight out of AutoCAD and gave up (this does not mean it doesn't work, just that they didn't want to try anymore. Don't know the specific reasons it didn't work).

In the DXF setup for Optinest to WoodWop, the Outline layer is set by default to

"V_Fraes_<e>T136". I'm not expert in WoodWop DXF names, but I'm guessing that "V_Fraes" means a milling operation and "T136" is the tool number on the machine. The "<e>" means the thickness of the material.
