Global Health: today's challenges. Reviewing the latest global health trends, this chapter finds disturbing evidence of widening gaps in health worldwide. In 2002, while life expectancy at birth reached 78 years for women in developed countries, it fell back to less than 46 years for men in sub-Saharan Africa, largely because of the HIV/AIDS epidemic.

A key purpose of the Framework for Action is to promote a common understanding of what a health system is and what constitutes health systems strengthening. It also provides a basis to support countries in scaling up health systems and services: addressing bottlenecks in a collaborative, coordinated way, driven by desired health outcomes, to achieve sustainable system-wide effects.

Healthcare reform in the United States is a significant, strongly debated issue that has been argued since the early 1900s. Though this issue has been in circulation for decades, by integrating various new models and approaches, a more sustainable national healthcare system can perhaps be realized. *Evaluating Challenges and Opportunities for Healthcare Reform* presents comprehensive coverage of the development of new models of healthcare systems that seek to create sustainable and optimal healthcare by improving quality and decreasing cost. While highlighting topics including high-value care, patient interaction, and sustainable healthcare, this book is ideally designed for government officials, policymakers, lawmakers, scholars, physicians, healthcare leaders, academicians, practitioners, and students and can be used to help all interested stakeholders to make well-informed decisions related to healthcare reform and policy development for the United

Comparative Health Systems: Global Perspectives explores the health systems of 17 countries through comparative study. Using a consistent framework, the chapters offer an overview of each country's history, geography, government, and economy, as well as a detailed analysis of the country's healthcare system facilities, workforce, technology, cost, quality, and access. Current and emerging issues are also explored. The book concludes with a look at the changing U.S. healthcare system and the global challenges and opportunities for health.

The idea of person-centred health systems is widely advocated in political and policy declarations to better address health system

challenges. A person-centred approach is advocated on political, ethical and instrumental grounds and believed to benefit service users, health professionals and the health system more broadly. However, there is continuing debate about the strategies that are available and effective to promote and implement 'person-centred' approaches. This book brings together the world's leading experts in the field to present the evidence base and analyse current challenges and issues. It examines 'person-centredness' from the different roles people take in health systems, as individual service users, care managers, taxpayers or active citizens. The evidence presented will not only provide invaluable policy advice to practitioners and policymakers working on the design and implementation of person-centred health systems but will also be an excellent resource for academics and graduate students researching health systems in Europe.

The preeminent doctor and bioethicist Ezekiel Emanuel is repeatedly asked one question: Which country has the best healthcare? He set off to find an answer. The US spends more than any other nation, nearly \$4 trillion, on healthcare. Yet, for all that expense, the US is not ranked #1 -- not even close. In Which Country Has the World's Best Healthcare? Ezekiel Emanuel profiles eleven of the world's healthcare systems in pursuit of the best or at least where excellence can be found. Using a unique comparative structure, the book allows healthcare professionals, patients, and policymakers alike to know which systems perform well, and why, and which face endemic problems. From Taiwan to Germany, Australia to Switzerland, the most inventive healthcare providers tackle a global set of challenges -- in pursuit of the best healthcare in the world.
