New Syllabus Mathematics (NSM) is a series of textbooks specially
designed to provide valuable learning experiences to engage the hearts
and minds of students sitting for the GCE O-level examination in
Mathematics. Included in the textbooks are Investigation, Class
Discussion, Thinking Time, Journal Writing, Performance Task and
Problems in Real-World Contexts to support the teaching and learning
of Mathematics. Every chapter begins with a chapter opener which
motivates students in learning the topic. Interesting stories about
Mathematicians, real-life examples and applications are used to arouse
students' interest and curiosity so that they can appreciate the
beauty of Mathematics in their surroundings. The use of ICT helps
students to visualise and manipulate mathematical objects more easily,
thus making the learning of Mathematics more interactive. Ready-to-use
interactive ICT templates are available at [http://www.shinglee.com.sg/
StudentResources/](http://www.shinglee.com.sg/StudentResources/)

Cambridge O Level Principles of Accounts has been designed
specifically to meet the requirements of the Cambridge syllabus.
Cambridge O Level Principles of Accounts has been written specifically
for the Cambridge O Level Accounting syllabus. Accounting principles
and practices have been explained in simple language to enhance the
accessibility of the contents to students whose first language is not
English. The book reflects the changes in the O Level Principles of
Accounts syllabus and applies international accounting terminology.

This second edition, written especially to support the University of
Cambridge International Examinations IGCSE Mathematics (0580)
syllabus, is now in full colour and includes a student's CD. The text

is ideal for students following the Extended Curriculum. International contexts are used throughout to aid understanding and ensure this text is relevant to students everywhere.

Written by well-respected authors, the suite provides a comprehensive, structured resource which covers the full Cambridge Secondary 1 framework and seamlessly progresses into the next stage. This engaging course supports teaching of the Science framework both theoretically and practically, with full coverage of the Scientific Enquiry framework integrated throughout the series. This Coursebook for Stage 7 gives a thorough introduction to the concepts, and offers a wealth of ideas for hands-on activities to make the subject matter come to life.

Written by well-respected authors, the Cambridge Checkpoint Mathematics suite provides a comprehensive structured resource which covers the full Cambridge Secondary 1 Mathematics framework in three stages. This brightly illustrated Coursebook for Stage 9 offers a comprehensive introduction to all topics covered in the syllabus. Worked examples show students how to tackle different problems, and plenty of exercise questions prepare students for the different types of questions they will face in their Checkpoint exam. Coverage of the Problem Solving framework is integrated throughout the course, with questions relating to the Problem Solving framework statements highlighted in the Coursebook. There is an accompanying Practice Book and Teacher's Resource CD-ROM available separately.

This is a new edition of an existing textbook, with updated content for the 2006 syllabus. It is designed to be a student main text, and contains all you need to pass the IGCSE Extended exam.

It's been three months since Rob's younger sister, Chloe, fell into a coma after a riding accident, and his life is in disarray. Rob's parents spend most of their time at his sister's bedside, and his best friend is afraid to talk to Rob about Chloe. To distract himself, Rob takes a job working at a secret archaeological site, where workers have uncovered a mystical ring of black timbers. At its center an ancient tree is buried upside down in the earth—a tree with the power to transport Rob to the Unworld, where Chloe lives in a forest of enchanting dreams, trapped between life and death. Catherine Fisher has combined a fascinating exploration of myth with a modern quest for understanding. Where is the land of the imagination? And if we found our way there, would we ever want to come back?

Written by an experienced mathematics teacher Karen Morrison, the text is enquiry-based, designed for face-to-face learning and has an interactive approach to the subject. Case studies and questions are used to help students understand the implications of the topic.

This companion to Core Maths for A-level covers all the work necessary

for the mechanics component of all boards' syllabuses for A-level mathematics.

Dealing with mechanics and the solving of mechanical problems with the help of pure mathematics, this A-Level text introduces at an early stage an appreciation of the properties of vectors. Throughout the book problems are solved using vector methods where appropriate, and many worked examples are provided to illustrate each main development of a topic. A set of straightforward problems follows each section, and a selection of more challenging questions appears in the miscellaneous exercises at the end of most chapters, with multiple-choice questions on most topics.
