The WaveRunner III 650 (Marine Jet 650TL) was released as the world's first 3-passenger PWC, featuring a larger hull and high-performance engine. With truly pleasurable running performance and great stability, it started a new rage and became the predecessor of the later family models. It became a standard that is still seen on the water today.

I'm not getting fuel to the carb on my 650 waverunner 3. I installed a carb kit including new diaphragm for the fuel pump. The pulse line is working, fuel line is clear and return line is clear. I even installed a primer bulb inline to help with getting fuel to the pump. Still no fuel. Ski runs perfect when I pour fuel in carb.

If you're going to stick with something with a 650 motor, do NOT pay more than $800 for a VXR. Since Waverunner 3's are legal to carry 3 riders (and you can legally pull a tube/skiier with them), they tend to sell for a bit more, but if you're gonna pay $1200-1500 for a WR3, it better be REALLY nice.
