A Book of the Year, Uncut 'A wild rock 'n' roll fairground ride of the damned.' Observer \*\*\* We arrived in a fleet of white stretch limos at a clearing in a wood near Woking. Here the K Foundation was exhibiting a million pounds in cash, while Bill Drummond and Jimmy Cauty circled the perimeter in two orange Saracen armoured vehicles, blasting out Abba's 'Money Money Money' . . . Mick Houghton worked with some of the greatest, most influential and downright dysfunctional cult groups of the post-punk era and beyond - Ramones, Talking Heads, The Jesus and Mary Chain, The Undertones, Felt and Sonic Youth among them. But the three acts Mick is most closely identified with are Echo & the Bunnymen, Julian Cope, and the KLF. As confidant and co-conspirator, he navigated the minefield of rivalries and contrasting fortunes which make Fried & Justified such a candid, amusing and insightful picture of an exciting and inspirational period for music.

This book mobilises the theory of uneven and combined development to uncover the geopolitical economic drivers of China's rise. The purpose is to explain the formation and trajectory of its economic 'accumulation system' - which remains a confounding hybrid of statist and neoliberal forms of capitalism - as the outcome of China's geopolitical engagement of the USA during the late stages of the Cold War, and its participation in manufacturing global production networks (GPNs). Fear of geopolitical catastrophe drove China to open its economy, while GPNs enabled China to generate substantial export surpluses which could be recycled through state-owned banks as cheap credit and subsidies to large, vertically integrated and politically-controlled state-owned enterprises. In this way, a synergy emerged between the 'neoliberal' and 'Keynesian-Fordist' sectors of the economy, while the national-territorial state retained its form and expanded its functions. The book chronicles how this reliance on export surpluses, however, rendered China extremely vulnerable to external shocks - prompting a dramatic monetary and fiscal stimulus response to the crisis of 2008, even while sustaining the illusion of economic 'decoupling' from the global economy. Finally, it examines the growing role of the state in the current crisis-ridden economic model, as well as China's current geo-economic and geopolitical expansionism in areas such as the Belt and Road Initiative and the militarisation of the East and South China Seas.
