A New York Times Book Review Editor's Choice The Wall Street Journal calls The Sun in Your Eyes one of "the season's most exciting fiction reads." One of Vulture's "7 Books You Need to Read This July" Harper's Bazaar picked it as one of "Spring's Hottest Breakout Novels." Ann Hood says it's "the perfect summer book." A witty and winning new voice comes alive in this infectious road trip adventure with a rock-and-roll twist. Shapiro ’ s debut blends the emotional nuance of Elena Ferrante with the potent nostalgia of High Fidelity, in a story of two women—one rich and alluring, the other just another planet in her dazzling orbit—and their fervid and troubled friendship. From the distance of a few yards, there might be nothing distinctive about Lee Parrish, nothing you could put your finger on, and yet, if she were to walk into a room, you would notice her. And if you were with her, I ’ d always thought, you could walk into any room. For quiet, cautious and restless college freshman Vivian Feld real life begins the day she moves in with the enigmatic Lee Parrish—daughter of died-too-young troubadour Jesse Parrish and model-turned-fashion designer Linda West—and her audiophile roommate Andy Elliott. When a one-night stand fractures Lee and Andy ’ s intimate rapport, Lee turns to Viv, inviting her into her glamorous fly-by-night world: an intoxicating mix of Hollywood directors, ambitious artists, and first-class everything. It is the beginning of a friendship that will inexorably shape both women as they embark on the rocky road to adulthood. More than a decade later, Viv is married to Andy and hasn ’ t heard from Lee in three years. Suddenly, Lee reappears, begging for a favor: she wants Viv to help her find the lost album Jesse was recording before his death. Holding on to a life-altering secret and ambivalent about her path, Viv allows herself to be pulled into Lee ’ s world once again. But the chance to rekindle the magic and mystery of their youth might come with a painful lesson: While the sun dazzles us with its warmth and brilliance, it may also blind us from seeing what we really need. What begins as a familiar story of two girls falling under each other ’ s spell evolves into an evocative, and at times irrepressibly funny, study of female friendship in all its glorious intensity and heartbreaking complexity.

This book was first projected in 2004, when Author Hannah Fairbairn was teaching interpersonal skills at the Carroll Center for the Blind in Newton, Massachusetts. The experiences of her adult students—and her own experience of sight lost—convinced her that everyone losing vision needs access to good information about the process of adjustment to losing sight and practical ways to use assertive speech. When You Can ’ t Believe Your Eyes is intended for anyone going through vision loss, their friends, and families. It will inform readers how to get expert professional help, face the trauma of loss, and navigate the world using speech more than sight. Each of the twelve chapters in the book contain many short sections and bullet-point lists, intended to facilitate access to the right information. It begins where you begin—at the doctor ’ s office or the hospital. Since vision loss takes many forms, there are suggestions for questions you might ask to get a clear diagnosis and the best treatment. Part One also has a description of legal blindness and possible prevention, advice about your job, and tips for life at home. Part Two is about believing in yourself as you deal with the loss, the anger, and the fear before you come up for air and consider training. Parts Three and Four describe using assertive speech and action in all kinds of settings as

your independence and confidence increase. Part Five gives detailed information about everything from dating, and caring for babies to senior living, volunteering, and retaining your job. It is hoped that by reading and trying out the suggestions, the reader will recover full confidence, become a positive, assertive communicator, and lead a satisfying life. Because vision loss happens mostly in older years, the book is written with seniors particularly in mind. Professionals will also find it to be a useful resource for their patients.
